NUMBER 1

K. Ramesh, A. K. Yadav and V. A. Pankhawala	1	Classification of crack-tip isochromatics in orthotropic composites
T. Fett, E. Diegele and G. Rizzi	17	Calculation of stress fields near inclusions by use of the fracture mechanics weight function
G. Marci	23	Determination of the partitioning point dividing ΔK into ΔK_{eff}
H. Drar	37	Fractographic aspects of blunting at high loading rate
Qingxiong Zheng, Xiulin Zheng and Fenghui Wang	49	On the expressions of fatigue life of ceramics with given survivability
L. R. Dharani and F. S. Ji	57	Non-axisymmetric matrix cracking in unidirectional brittle matrix composites
Y. K. Tür and Ö. Vardar	69	Periodic tensile overloads in 2024-T3 Al-alloy
X.-M. Wang, S. Gao and Y.-P. Shen	79	An issue of the interaction between multicracks near the interface
Y. K. Cheung and C. P. Jiang	89	Application of the finite strip method to plane fracture problems
K. Y. Lam, T. E. Tay and W. Wang	97	The Dugdale solution for cracks at the edge of an elliptical hole in an infinite and finite plate
X.-M. Wang, S. Gao and Y.-P. Shen	107	Interaction between an interface and cracks
Kwang-Ho Lee, Jai-Sug Hawong and Sun-Ho Choi	119	Dynamic stress intensity factors K_I, K_{II} and dynamic crack propagation characteristics of orthotropic material
M. R. Bayoumi, A. A. Ismail and A. K. Abd El Latif	141	Finite element analysis of stresses due to pitting of steel specimens under different cyclic bending stresses

NUMBER 2

X. Cai and F. G. Yuan	153	Stress exponents of asymptotic solutions at the notch tip in anisotropic power law material under antiplane shear
Xi-Qiao Feng and Shou-Wen Yu	169	Analyses of damage localization at crack tip in a brittle damaged material

Chai Guozhong, Zhang Kangda and **Wu Dongdi**	179	Interactions of two coplanar elliptical cracks embedded in finite thickness plates under uniform tension
I. L. Lim, I. W. Johnston and **S. K. Choi**	193	A finite element code for fracture propagation analysis within elasto-plastic continuum
Jin Yu	213	The link between crack velocity and rupture time in creeping solids
Liu Chun-Tu and **Duan Meng-Lan**	231	Experimental investigation on low-temperature fatigue crack propagation in offshore structural steel A131 under random sea ice loading
Li Xiang-Ping and **Liu Chun-Tu**	239	Transient effect on ideally plastic stationary crack-tip fields
Xiulin Zheng, Zhen Li, Yongji Shi, Yanman Yang and **Zhijiang Shi**	251	Fatigue performance of old bridge steel and the procedures for life prediction with given survivability
A. Martinelli and **S. Venzi**	263	Tearing modulus, J-integral, CTOA and crack profile shape obtained from the load–displacement curve only
M. Kurose, Y. Hirose, T. Sasaki and **Y. Yoshioka**	279	Fractal characteristics of stress corrosion cracking in SNCM 439 steel having different prior-austenite grain sizes
S. Lahiri, B. V. Sankar and **P. A. Mataga**	289	Evaluation of bimaterial stress intensity factors using a finite element–boundary element alternating method
		Technical Notes
B. Nageswara Rao and **A. R. Acharya**	303	Fracture behaviour of a high strength medium carbon low alloy steel
L. Chattopadhyay	309	Size effect on crack-tip creep
	I	Software Survey Section

NUMBER 3

Yulan Liu, Biao Wang and **J.-P. Boehler**	311	A statistical mechanics model of phase transformation of zirconia particles in ceramics
A. A. Spector and **R. C. Batra**	329	On elastic joints containing interfacial cracks
G. S. Wang	345	Analysing the fatigue crack growth in structural details

T. Fett	363	Influence of bridging stresses on specimen compliances
P. R. Arora and **K. R. Y. Simha**	371	Analytical and experimental evaluation of cold-working process for strain hardening materials
H. Alawi, J. N. Alhajji and **M. R. Reda**	387	The effect of soft tap water chemistry on fatigue crack growth of steel
G. P. Cherepanov	399	An analysis of two models of super-deep penetration
S. A. Hamoush and **H. Abdel-Fattah**	425	The fracture toughness of concrete
V. V. Panasyuk, G. S. Ivanitska and **O. P. Ostash**	433	Determination of stress concentrator opening displacement
R. Pippan, K. Haberz and **H. P. Stüwe**	441	The plastic deformation of fracture surface contacts in fatigue
Li Qingbin, Zhang Chuhan and **Wang Guanglun**	449	Dynamic damage constitutive model of concrete in uniaxial tension
Han Xue-li and **Wang Duo**	457	The annular crack in a nonhomogeneous matrix surrounding a fiber under torsional loading—I. Inner crack tip away from or terminating at the interface
Han Xue-li and **Wang Duo**	465	The annular crack in a nonhomogeneous matrix surrounding a fiber under torsional loading—II. The crack going through the bimaterial interface into the fiber
Qingfen Li, Li Zhang, Guoqing Dong, Xiaobe Liu, Boming Zhong and **Jiaquan Wei**	473	Effect of several variables on J–COD relationship and plastic rotational factor r_p
P. R. Marur, P. S. Nair and **K. R. Y. Simha**	481	Two degrees of freedom modeling of precracked beams under impact

NUMBER 4

D. L. Chen, B. Weiss and **R. Stickler**	493	A model for crack closure
T. Fett	511	Failure of brittle materials near stress singularities
M. M. Abdel Wahab and **G. De Roeck**	519	A finite element solution for elliptical cracks using the ICCI method
N. A. Harder	527	Theory of brittleness in stress softening models of fracture mechanics

Z. Qian, S. Takezono and K. Tao	535	A nonlocal damage mechanics approach to high temperature fatigue crack growth
S. Vigdergauz	545	An effective method for computing the elastic field in a finite cracked disk
J. Z. Zuo, Z. W. Lou and Z. B. Kuang	557	A yield function for porous ductile materials
S. Güngör, A. D. Nurse and E. A. Patterson	561	Experimental determination of stress intensity factors of cracks in sheet structures with bolted stiffeners
J. H. Kuang and Y. C. Chen	571	Crack initiation load characterization using the critical plastic energy
J. Spurrier, P. Hancock and J. P. Chubb	581	An assessment of weld mis-matching
Yen-Ling Chung and Yeou-Cherng Chiang	593	Dynamic micro-structural finite element method for granular structures
B. Liu, H. Kimoto and H. Kitagawa	607	Elastic–plastic analysis of a crack parallel to the interface
K. S. Zhang	625	Analysis of deformation and fracture for cracked specimen of ductile steel
Weisheng Lei, Mei Yao and Bingsen Chen	633	Quantitative description of temperature- and strain rate-dependence of yield strength of structural steels
Weisheng Lei and Mei Yao	645	The physical nature of drop-weight-test NDT
M. Zheng, C. Hu, Z. J. Luo and X. Zheng	653	A ductile damage model corresponding to the dissipation of ductility of metal
Y. Murase, K. Nakagawa, T. Hachiya and S. J. Duan	661	Introduction of stress functions around a circular interface crack between dissimilar materials
	I	Software Survey Section

NUMBER 5

RELIABILITY OF STRUCTURAL AND MECHANICAL COMPONENTS UNDER FATIGUE

G. I. Schuëller	675	Preface
J. N. Yang and S. D. Manning	677	A simple second order approximation for stochastic crack growth analysis
K. Farhangdoost and J. W. Provan	687	A stochastic systems approach to fatigue reliability—an application to Ti-6Al-4V

M. M. Rocha and **G. I. Schuëller**	707	A probabilistic criterion for evaluating the goodness of fatigue crack growth models
Wing Kam Liu, Yijung Chen, T. Belytschko and **Yuan Jie Lua**	733	Three reliability methods for fatigue crack growth
V. V. Bolotin	753	Reliability against fatigue fracture in the presence of sets of cracks
S. Kandarpa, B. F. Spencer, Jr and **D. J. Kirkner**	761	Reliability analysis of structural components utilizing the strain-life method
Zhengwei Zhao and **Achintya Haldar**	775	Bridge fatigue damage evaluation and updating using non-destructive inspections
G. Deodatis, H. Asada and **S. Ito**	789	Reliability of aircraft structures under non-periodic inspection: a Bayesian approach
R. G. Tryon, T. A. Cruse and **S. Mahadevan**	807	Development of a reliability-based fatigue life model for gas turbine engine structures
	I	Software Survey Section

NUMBER 6

J. D. Dougherty, T. S. Srivatsan and **J. Padovan**	829	Cyclic stress response, strain resistance and fracture behavior of modified 1070 steel
R. J. Qian	849	Applying strain energy density factor theory to propagation estimating of surface crack in tubular T-joints
S. Krenk, J. Jönsson and **L. P. Hansen**	859	Fatigue analysis and testing of adhesive joints
J. W. Leggoe, X. Z. Hu and **M. B. Bush**	873	Crack tip damage development and crack growth resistance in particulate reinforced metal matrix composites
J. M. Baney, Y. H. Zhao and **G. J. Weng**	897	Progressive debonding of aligned oblate inclusions and loss of stiffness in a brittle matrix composite
G. Maymon	911	The problematic nature of the application of stochastic crack growth models in engineering design
S. Dhar, R. Sethuraman and **P. M. Dixit**	917	A continuum damage mechanics model for void growth and micro crack initiation
D. Taylor and **S. Lawless**	929	Prediction of fatigue behaviour in stress-concentrators of arbitrary geometry

W. T. Ang and **D. L. Clements** 941 Periodic array of staggered planar cracks in an anisotropic elastic medium

A. N. Das 947 Skew crack extension due to tearing of an elastic half-space

H. Y. Lee and **C. S. Hong** 957 A new weight function approach using indirect boundary integral method

B. Farahmand and **G. E. Bockrath** 975 A theoretical approach for evaluating the plane strain fracture toughness of ductile metals

Technical Notes

P. Shanmugam and **S. D. Pathak** 991 Some studies on the impact behavior of banded microalloyed steel

W. Y. Shen and **P. Clayton** 1007 Fatigue of fillet welded A515 steel

I Software Survey Section
